Note: Prices are determined from Saskatchewan auction marts' reports of sale results from Thursday of the previous week to Wednesday the current week. N.A. means not available due to lack of sufficient data.

Canfax reported that a total of 6,917 head of cattle were sold in Saskatchewan this week, down from 8,494 head sold the previous week, but up from 5,368 head the same week a year ago.

Saskatchewan feeder steer prices were reported in all weight categories over the week with feeder steer prices primarily lower in most weight categories. Feeder steer prices ranged between \$8.33 per cwt lower and \$9.00 per cwt higher. The 900+ lb. feeder steer weight category had the only price gain; while the 300-400 lb. weight category had the largest losses over the week. On average, feeder steer prices declined by almost \$2 per cwt over the week. Saskatchewan feeder steer prices moved contrary to Alberta and Manitoba feeder steer prices, which moved higher.

Saskatchewan feeder heifer prices were reported in all weight categories over the week with prices mixed but overall higher. Feeder heifer prices over the week ranged between \$2.65 per cwt lower and \$10.50 per cwt higher from the previous week. The biggest price gain over the week was in the 300-400 lb. feeder heifer weight category; while the largest price loss was in the 600-700 lb. weight category. On average, feeder heifer prices increased by over \$2 per cwt.

The Saskatchewan 750 lb. feeder steer basis compared to the May 11, 2017, U.S. feeder cattle index at US\$143.48 per cwt was calculated at (+\$15.57) per cwt (\$212.33 - US\$143.48/0.7292), a basis narrowing of \$1.52 per cwt from (+\$14.05) per cwt compared to the previous week.

Feeder cattle daily futures prices were volatile over the week starting the week higher Monday and ended Friday higher; but had significant daily losses Tuesday to Thursday to end the week mixed, week-over-week. The nearby May contract increased US\$0.775 per cwt to settle Friday at US\$144.550 per cwt; while the August 2017 contract declined US\$1.600 per cwt to settle Friday at US\$151.825 per cwt.

Choice beef cutout prices reached levels not established since July 2015.

USDA World Agricultural Supply and Demand Estimates (WASDE)

On May 10, the USDA released the May World Agricultural Supply and Demand Estimates (WASDE). The May USDA WASDE report revised the 2017 United States Red Meat and Poultry production estimates to 100.735 billion lb., a slight decrease (0.3 per cent) from the April estimates, but a 3.2 per cent increase from 97.612 billion lb. produced in 2016. Beef production estimates in May for 2017 were estimated at 26.310 billion lb., down 0.7 per cent from the April estimates due to lower carcass weights, but 4.3 per cent higher than 2016 U.S. beef production.

Leading the way in United States meat production increases in 2017 (by percent) are projected to come from pork (+4.5%), beef (+4.3%), and turkey (+2.4%), followed by broilers (+1.9%). (Source: USDA WASDE)

United States crop projections for (2017/2018) have projected corn acreage at 90 million acres, down from 94 million acres the previous year. Lower corn acres along with lower yield projections have reduced corn production by almost 1.1 billion bushels from the previous year. While U.S. corn production is projected to be significantly lower; reduced corn exports and usage may only reduce ending supplies by less than ten per cent. U.S. Soybean production is expected to take corn acres away as soybean acreage is projected at 89.5 million acres, up from 83.4 million acres the previous year. Production is however estimated to slightly decline from the previous year based on lower soybean yields. With higher projected soybean imports; U.S. ending soybean stocks are actually projected to increase 10 per cent from the previous year.
