

## PRESS RELEASE - January 9, 2026

SCA is calling on the CFIA to immediately halt the implementation of the proposed federal traceability regulatory changes to listen to concerns of cattle producers across Saskatchewan and Canada. We have repeatedly stated that the regulations should not be burdensome for our producers.

Thank you to all the producers who have reached out and commented on the proposed regulatory changes. We understand your concerns and frustrations and want to ensure that we have heard you and will continue to work for you.
