

2017-048: Implications of Carbon Pricing for Canada's Beef Sector: Quantitative Analysis and Assessment of Revenue Recycling

Researcher: Brandon Schaufele

Funding: \$8,000

The aim of this project is to understand the impacts of a carbon tax on the cattle industry and the tools that could be used to reduce the impact on the industry. This includes implications from the Federal Carbon Tax policy in terms of beef farm profitability and competitiveness, interprovincial trade disruptions, and international trade implications.
